# An Ideal Equipment for the Busy Practitioner

1898

1928

## THIRTY YEARS OF PROGRESS WITH CAMPBELL

Model "G"

The first successful X-Ray and High Frequency Apparatus manufactured in the United States was built by  
**CAMPBELL**  
1898

Introduced to A. M. A. 1901

Ten years later thousands of improved types were giving service to the medical profession.

Model "E"

Model "I"

Steady and constructive progress by CAMPBELL engineers, produced the perfected combination X-Ray and Electro-Medical equipment pictured to the left, many times copied but never equaled.

And now, in 1928, just thirty years since CAMPBELL produced the first Diathermy apparatus in the United States, there is available a complete line of efficient quality X-Ray equipment pictured on pages 1 to 14 inclusive of this booklet as well as four models of Diathermy apparatus (pages 23 to 28 inclusive), producing every modern medical effect in advance of anything yet offered. Send for catalogue.
